DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12 and 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bosko.

Bosko discloses the invention substantially as claimed. Bosko further discloses that the spherical bodies may be interchanged according to the weight desired by the user (col.3, lines 44-60), and short and long bars can be used (col.5, lines 40-45). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate spherical elements adapted to fit the palm and a total length spanning the shoulder span of a person in order to achieve a device for massaging the palms of the user.
